: **MEAC**

Since it started more than 16 years ago, the company had one main objective, Water Conservation and Management. As water is becoming a very scarce resource the company set its policy to make the best use of it in irrigation by using advanced and high technical irrigation systems, that ensure the correct use of the water with minimal losses and maximum efficiency.

In order to reach this objective the company has invested all its experience and the experience and the knowledge of its specialized employees, to promote and use the latest development in the field of irrigation.

**MEAC** represents international specialized manufacturers of irrigation system equipments.

**HUNTER INDUSTRIES INC., USA.** One of the top manufacturers for landscape irrigation products.

**MOTOROLA, USA.** The leader in central control and water management systems.  
**PLASTIC ALPHA, ITALY.** One of the top manufacturers of fittings for irrigation and water systems.

**KSB PUMPS, GERMANY.** A full range of water pumps.

In addition to the above, **MEAC** has a complete range of irrigation accessories from international manufacturers.

**MEAC** scope of work is to design, supply, execute and support agricultural and landscape irrigation systems. **MEAC** policy is to provide high quality and efficient irrigation systems that ensure water saving, energy saving and minimize the operation and maintenance cost at the optimal capital investment.
